## ThroughTek and Advance Vision Electronics create IoT smarter home solution

*Press release [Tuesday 28 April 2015]*

ThroughTek Co., Ltd. (ThroughTek), a leading Internet of Things (IoT) and Machine to Machine (M2M) solution provider, and Advance Vision Electronics Co., LTD. (Advance Vision Electronics) cooperate to showcase the advantages of integrating IoT solutions to security cameras with multimedia applications at SMAhome International Exhibition 2015 in Taipei. The exhibit will primarily focus on the Kalay cloud platform and VSaaS (Video Surveillance as a Service), a key component module, which allows transmission of multimedia in real-time and recorded video, and enabling centralized management via web portal.

ThroughTek has specialized in ad-hoc online Peer-to-peer (P2P) technology and solution for real time streaming of multimedia has assisted in countless implementation of IC design companies, manufacturers and service providers integrated to the marketplace. The continued success of ThroughTek led to the decision of releasing the Kalay cloud platform in 2014, a flexible and scalable IoT cloud based platform designed to help enterprise and consumers to quickly and effectively deploy their connected device ecosystems. Kalay provides a complete IoT solution with 17 modules, empowering enterprise and consumers to build their own customized cloud service platforms tailored to their needs. The Kalay cloud platform features a unique tunneling technology that allows for seamless experience of real-time viewing of live streaming and recorded video from personal storage for network cameras, so that end users can enjoy multimedia whenever and wherever without constraint.

Advance Vision Electronics has extensive experiences in OEM and ODM business for comprehensive network cameras with support for P2P technologies. With ThroughTek's Kalay cloud platform, Advance Vision Electronics can offer customers with a more competitive product, providing video streaming integration as an improved service and solution for smart homes.

The ability to build intelligent relations and communication between devices with IoT implementations will create business opportunities for hardware manufacturers. Collaborations between cloud service platforms and embedded hardware will be the trending topic at SMAhome International Exhibition this year.

SMAhome International Exhibition 2015 will be held in Taipei, Taiwan at the Nangang Exhibition Hall from 28-30 April to present comprehensive security supply chain market and address the latest topics about IoT to help transform businesses within the industry.

### About ThroughTek

Committed to internet cloud platform development, ThroughTek's Kalay platform integration leverages a wealth of APIs for a variety of operating systems, thereby quickly and easily incorporating diversity of devices into online application. ThroughTek is proud to partner with chipset vendors, SoC vendors, OEM/ODM, and major branded companies.
